

KENKOSEAT® II

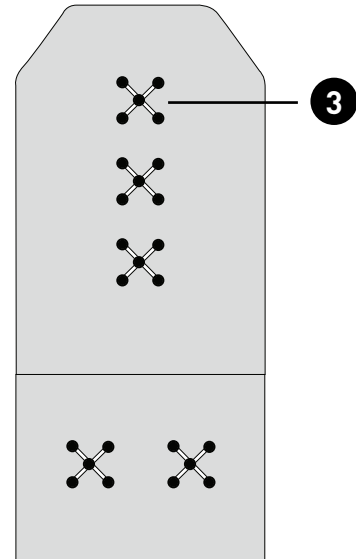

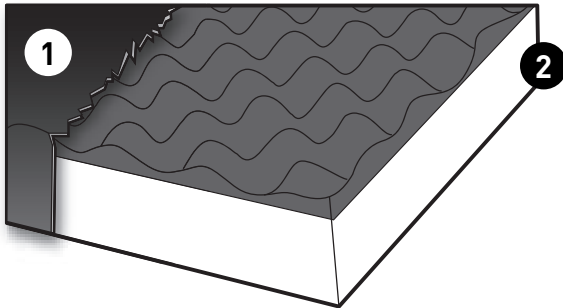

QUICK REFERENCE SHEET

- Provides support and comfort while seated
- SpyderRAM™ Technology
- Pure, 100% natural latex core
- Breathable for ventilation
- Durable 100% nylon cover

KenkoSeat II construction

- 1 Nylon top cover
- 2 Natural latex core
- 3 SpyderRam nodes (five, 25 magnets)

KENKOSEAT II FEATURES/BENEFITS:

- Firm, cushioned support Promotes correct posture for back.
- Pure natural latex Supportive, naturally hypoallergenic and durable.
- SpyderRAM Technology Advanced technology for deeper field, helps replicate the Earth's natural environment.
- Nylon cover Easy care, ventilated for year-round comfort.
- Generous dimensions Extend across the seating surface.
- Security straps. Hold the KenkoSeat II firmly in place.

KENKOSEAT® II

QUICK REFERENCE SHEET

THE FACTS

- Today, men and women spend the majority of their time in a sitting position, on the job and at home. KenkoSeat II features Nikken SpyderRAM™ Technology and a natural latex foundation so that users can enjoy the benefits of the Kenko Sleep System even while awake.
- The KenkoSeat II has patent-pending SpyderRAM technology. SpyderRAM employs several nodes, each containing a series of spherical magnets. These spheroids are set in a progressive axial rotation, to create overlapped or staggered magnetic fields for maximum coverage. The magnet receptacles incorporate internal projections that fit into corresponding cavities in the magnetic spheres, locking them into place at precise angles.
- The SpyderRAM nodes are constructed of flexible silicone, to allow each arm of the weblike matrix a degree of independent mobility. Flexion of the silicone results in the SpyderRAM system conforming to any surface it contacts.
- Human beings lived within the Earth's magnetic field for thousands of years, until modern civilization removed its influence. Nikken SpyderRAM Technology helps to create an environment more similar to our original, natural surroundings.
- The KenkoSeat II features a pure, 100% natural latex core. Latex is inherently antimicrobial, hypoallergenic and resistant to dust mites. Its open-cell structure provides a natural venting system that resists heat and moisture buildup.
- Latex is also highly resilient, which provides both firm support and flexibility. It resists sagging and remains supportive for many years.
- As a natural substance, latex does not contain the chemicals present in polyurethane foam or other artificial seat materials. It is a completely renewable resource.
- The nylon cover has a smooth surface and is ventilated for breathability, for temperature regulation and comfort in any climate.
- The dual security straps are designed to attach the KenkoSeat II in seconds, for portability. It can be removed and transferred easily, to travel wherever you go.

PRODUCT INFORMATION

ITEM CODE	DESCRIPTION
#14092	KenkoSeat II
AVAILABILITY	
US: YES	CN: YES
FEATURED NIKKEN TECHNOLOGY	
SpyderRAM Technology	
DIMENSIONS	
18 x 42 in/46 x 107 cm	
GAUSS RATING	
800-1,000 per magnet	
MATERIALS CONTAINED IN PRODUCT	
Latex, ferrite magnets, nylon	
CARE INSTRUCTIONS	
Spot clean only, do not oversaturate. Do not jump or place heavy objects on seat.	
WARRANTY INFORMATION	
One-year Nikken standard limited warranty. Warranty is void if the cover is removed.	

CAUTION: If you use an electronic medical device such as a pacemaker, or have a magnetically sensitive surgical implant, do not use or wear magnetic products. Women in the first trimester of pregnancy, or anyone who has a health problem should first consult a physician before using magnetic products. Do not place magnetic products in direct contact with magnetically sensitive items such as watches, audio/video tapes, credit cards, portable electronic equipment, etc.

QUICK SHARING TIP

Try sitting on a chair without the KenkoSeat II first, then slip it into place. The difference is immediately noticeable.

The average person spends several hours every day in a seated position — more time than for sleeping or standing. Wouldn't it be a good idea to have the benefits of Nikken Kenko technology during the day?
